Description :

PDF-a677a | In terms of quantity and breadth, the Smithsonian Institution's collection of longhorned woodboring beetles is one of the most important in the world. The effort to establish and describe this collection began as early as 1889, when the Smithsonian hired its first coleopterist (who was also only the second salaried entomologist at the Institution). In the years that followed, the collection grew... *Longhorned Woodboring Beetles (Coleoptera: Cerambycidae and Disteniidae): Primary Types of the Smithsonian Institution (Smithsonian Contribution to Knowledge)*
